| Project Title                                                                                                                            | Funding     | Institution                                             |  |
|------------------------------------------------------------------------------------------------------------------------------------------|-------------|---------------------------------------------------------|--|
| Evaluating a 3D VLE for developing social competence                                                                                     | \$100,000   | University of Missouri                                  |  |
| Improved quality of life for people with autism and their families by integrating biomedical and behavioral approaches                   | \$100,000   | State University of New York                            |  |
| Transcranial magnetic stimulation (RTMS) for evaluation and treatment of repetitive behavior in subjects with autism spectrum disorders  | \$60,000    | Columbia University                                     |  |
| Technology support for interactive and collaborative visual schedules                                                                    | \$42,000    | University of California, Irvine                        |  |
| Long-term follow-up of children with autism who recovered                                                                                | \$33,965    | Center for Autism and Related Disorders                 |  |
| Parent mediated behavioral treatment of food selectivity                                                                                 | \$30,966    | Center for Autism and Related Disorders                 |  |
| Targeted pharmacologic interventions for autism                                                                                          | \$341,475   | Indiana University-Purdue University Indianapolis       |  |
| 3/3-Atomoxetine placebo and parent training in autism                                                                                    | \$271,708   | University of Rochester                                 |  |
| Chart review of 38 cases of recovery from autism                                                                                         | \$35,117    | Center for Autism and Related Disorders                 |  |
| Altering motivational variables to treat stereotyped behavior                                                                            | \$100,000   | St. Cloud State University                              |  |
| 2/3-Atomoxetine placebo and parent training in autism                                                                                    | \$343,820   | The Ohio State University                               |  |
| 1/3-Atomoxetine placebo and parent training in autism                                                                                    | \$272,252   | University of Pittsburgh                                |  |
| Autism spectrum disorders                                                                                                                | \$380,523   | Three C Institute For Social Development                |  |
| Fathers as in-home trainers of autistic children                                                                                         | \$236,843   | University of Florida                                   |  |
| Effects of follow-through during DTT on verbalizations                                                                                   | \$11,231    | Center for Autism and Related Disorders                 |  |
| Related services intervention for expressive and receptive language skills in autism spectrum disorder and in cognitive impairment       | \$295,657   | Vanderbilt University                                   |  |
| Social communication and symbolic play intervention for preschoolers with autism                                                         | \$310,790   | Univsity of North Carolina at Chapel Hill               |  |
| Comparison of two comprehensive treatment models for preschool-aged children with autism spectrum disorders and their families           | \$756,312   | University of North Carolina at Chapel Hill             |  |
| Autism Intervention Research network on Behavioral health (AIR-B network)                                                                | \$2,000,000 | University of California, Los Angeles                   |  |
| Teaching children to comprehend rules containing "if/then"                                                                               | \$38,994    | Center for Autism and Related Disorders                 |  |
| Teaching children to identify causes of others' emotions                                                                                 | \$20,687    | Center for Autism and Related Disorders                 |  |
| Teaching theory of mind skills to children with ASD                                                                                      | \$24,025    | Center for Autism and Related Disorders                 |  |
| Translating pivotal response training into classroom environments                                                                        | \$473,411   | Rady Children's Hospital Health Center                  |  |
| Development of an intervention to enhance the social competencies of children with Asperger's/high functioning autism spectrum disorders | \$335,984   | University at Buffalo, The State University of New York |  |
| Assessing preference for reinforcers in children with autism                                                                             | \$29,684    | Center for Autism and Related Disorders                 |  |
| Teaching children to identify others' preferences                                                                                        | \$22,058    | Center for Autism and Related Disorders                 |  |
| Telemedicine approach to teaching pill-swallowing skills                                                                                 | \$14,168    | Center for Autism and Related Disorders                 |  |
| Establishing liquid medication administration compliance                                                                                 | \$27,985    | Center for Autism and Related Disorders                 |  |
| Identifying factors that predict response to intervention                                                                                | \$21,965    | Center for Autism and Related Disorders                 |  |
| Optimizing discrete-trial procedures for ASD children                                                                                    | \$177,625   | University of Massachusetts Medical School              |  |
| Educating parents: Behavioral intervention in autism                                                                                     | \$490,843   | Praxis, Inc.                                            |  |
| Portable guidance in autism spectrum disorder                                                                                            | \$503,554   | Symtrend, Inc.                                          |  |

| Project Title                                                                    | Funding     | Institution                                          |  |
|----------------------------------------------------------------------------------|-------------|------------------------------------------------------|--|
| Comprehensive web-based digital interactive scene program for language in autism | \$183,220   | Monarch Teaching Technology, Inc.                    |  |
| Age and treatment intensity in behavioral intervention                           | \$34,879    | Center for Autism and Related Disorders              |  |
| Clinical phenotype: Treatment response core                                      | \$199,980   | University of California, San Diego                  |  |
| ACT online: Stress reduction for parents who have children with DD               | \$233,890   | Iris Media, Inc.                                     |  |
| Theory of mind software for autism and other communication disorders             | \$798,241   | Laureate Learning Systems, Inc.                      |  |
| Development of MGLUR5 antagonists to treat fragile X syndrome and autism         | \$1,068,100 | Seaside Therapeutics, LLC                            |  |
| Pediatric pharmacology research unit                                             | \$358,400   | Wayne State University                               |  |
| Functional analysis and treatment of symptoms of autism                          | \$250,055   | University of Nebraska Medical Center                |  |
| Treatment of medical conditions among individuals with autism spectrum disorders | \$465,840   | National Institutes of Health                        |  |
| Functional neuroimaging of psychopharmacologic intervention for autism           | \$154,492   | University of North Carolina at Chapel Hill          |  |
| Pharmacotherapy of pervasive developmental disorders                             | \$184,202   | Indiana University-Purdue University at Indianapolis |  |
| ADHD symptoms in autism: Cognition, behavior, treatment                          | \$273,390   | University of Texas Health Science Center at Houston |  |
| Novel pharmacological strategies in autism                                       | \$305,254   | Indiana University-Purdue University Indianapolis    |  |
| Long-term olanzapine treatment in children with autism                           | \$433,658   | Drexel University                                    |  |
| Desensitization techniques for difficult behaviors                               | \$25,000    | Southwest Autism Research & Resource Center          |  |
| Remote parent training project                                                   | \$70,000    | Southwest Autism Research & Resource Center          |  |
| Communication success and AAC: A model of symbol acquisition                     | \$347,678   | University of Kansas                                 |  |
| A cognitive-behavioral intervention for children with autism spectrum disorders  | \$132,249   | Virginia Polytechnic Institute and State University  |  |
| Guiding visual attention to enhance discrimination learning                      | \$142,587   | University of Massachusetts Medical School           |  |
| Using CBPR to design & pilot a physical activity program for youth with ASD      | \$192,386   | University of Massachusetts Medical School           |  |
| Pharmacogenomics in autism treatment                                             | \$171,000   | University of California, Davis                      |  |
| Stimulus structure enhancement of visual symbol detection in AAC                 | \$147,762   | University of Massachusetts Medical School           |  |
